# QUESTIONS AND ANSWERS FOR SOLICITATION N66001-02-R-5010

#### **AMENDMENT 0002**

1. **QUESTION:** Will the government please provide clarification on L-328 Estimated Level of Effort on Pages 78 through 80. There are no straight time man-hours for the Field Technician Labor category, but there are 2,000 hours of Overtime assigned for Field Technician. Also the total hours do not appear to be correct. The total hours listed in the RFP are 117,800; however, they only total 113,800.

ANSWER: Amendment 0001 corrected page 79 and added the labor category and hours for Field Technician. Change the hours for all years for the Sr. Field Technician from 2,000 hours to 4,000 hours. The total hours for each year should now total 117,800 hours. Replace page 79 in its entirety with the new corrected page 79 attached hereto.

2. QUESTION: Page 53, Section J, lists Attachment IV as "Personnel Qualifications." Attachment IV is "Key Personnel Qualifications"; no other qualifications are given for other labor categories. Will the government provide the qualification requirements for all contract labor categories listed on page 78 through 80?

**ANSWER**: The Non-Key Personnel Qualifications are attached hereto to be included as part of Attachment IV Personnel Qualifications.

3. QUESTION: Amendment 0001, Attachment IV-I requires that the Offeror complete the category, individual name and total hours, and annual hours to the proposed contract. The Matrix shows total hours at the bottom of the form, implying that the sum of all hours represented must total 117,800 hours. The instructions indicate that the Attachment IV is only for key personnel/categories. Will the Government confirm that Attachment IV-1 should be filled out for all key personnel/categories (100% of all key category hours)?

**ANSWER:** The Attachment IV-1 Personnel Matrix is only for key personnel categories. The total hours for key personnel is 90,000. Replace Attachment IV-1 in its entirety with the new Attachment IV-1 attached hereto.

The contractor shall provide personnel who are fully qualified and competent to perform the full range of tasks described in the SOW. The desired qualifications for non-key personnel under this contract are stated below.

#### INSTALLATION DESIGN ENGINEER

Education: A Bachelor of Science degree in Engineering

General Experience: Six (6) years experience in the development of design packages for SHIPALT installations including conducting weight and moment analyses.

### SR. INSTALLATION TECHNICIAN

Education: An Associate's degree in an electronics related field. A graduate of a military or technical school in an electronics or communications curriculum

General Experience. Eight (8) years experience in the AIT installation of shipboard electronic systems. This experience should include the following areas: preparing planning documents such as Work Breakdown Structures and Plan of Action and Milestones for executing installations from initiation to completion; leading/managing installation efforts; interfacing with military and civilian personnel; performing system level testing, fault isolation, and repair; providing on-the-job training on equipment/system operation to shipboard personnel; and using shipboard installation standards.

#### INSTALLATION TECHNICIAN

Four (4) years experience in the AIT installation of shipboard electronic systems. This experience should include the following areas: serving as member of installation teams; performing system level testing, fault isolation, and repair; providing on-thejob training on equipment/system operation to shipboard personnel; and using shipboard installation standards.

### SENIOR FIELD TECHNICIAN (ANTENNA)

Eight (8) years experience in the installation and/or maintenance of communication antennas. This experience should include the following areas: preparing planning documents such as Work Breakdown Structures and Plan of Action and Milestones for executing installations from inception to completion; leading/managing installation efforts; interfacing with military and civilian personnel; designing antenna matching networks and matching antennas; conducting EMI and RFI testing; performing testing, fault isolation, and repair of antenna systems; providing on-the-job training on radio communication system operation and maintenance to shipboard personnel; and experience with the following types of antennas and antenna subsystems: Discone Cage; Fan Antennas; Phased Arrays; Rhombic; Periodic Log; Phased Spiral; Inverted Cones; Phased Colinear; 1/4, 1/2, 5/8 Full Wave Towers, and 18, 22, 35 ft spun aluminum and fiberglass whips; antenna tilt mechanisms.

### SENIOR FIELD TECHNICIAN

Eight (8) years experience in the test, inspection, and repair of shipboard electronic systems. This experience should include the following: leading/managing test and inspection efforts; interfacing with military and civilian personnel; performing system level testing, fault isolation, and repair; providing on-the-job training on equipment/system operation and maintenance to shipboard personnel; debriefing test results to ships force and other cognizant personnel.

#### FIELD TECHNICIAN

Four (4) years experience in the test, inspection and repair of shipboard electronic systems. This experience should include the following: member of test and inspection team; performing equipment level testing, fault isolation, and repair; providing onthe-job training on equipment/system operation and maintenance to shipboard personnel.

### OVERHAUL REPAIR TECHNICIAN

Should be 2M certified and have six (6) years experience in the overhaul and/or repair of communication equipment including antenna tilt mechanisms.

### **ELECTRONIC MECHANIC**

Four (4) years experience performing electro-mechanical assembly of a wide variety of electrical, electronic, and mechanical parts into subassemblies, assemblies, subsystems and systems. This experience should include the following: reading, interpreting and applying information from schematics, wire diagrams, wire lists, mechanical drawings and assembly drawings in electro-mechanical assembly; assembling and wiring high density electronic connectors, switchboards, equipment racks, etc.

### **MECHANICAL ASSEMBLER**

Two (2) years experience in assembly, installation and/or removal of electronic chassis and equipment enclosures/racks and in installation and/or removal of cable harnesses, coaxial lines, cable ducts and cable racks.

#### WELDER

Should be HY-80 certified and should be HY-100 certified for specific material and process in accordance with MIL-STD-248 prior to performing production work. Should have five (5) years experience in electric arc, gas shield arc and gas welding. Experience should include executing welds in all positions, with all types of metals and alloys with, particular reference to aluminum and steel, in various shapes including pipes, structural forms, plates, sheet-metal, bar stock, machinery and equipment.

#### DRAFTSMAN

Should have four (4) years experience in the development of shipboard installation drawings. Should have two (2) years experience with computer aided drafting AUTOCAD version 12.0 or higher in accordance with military drawing standards. **CONFIGURATION MANAGEMENT SPECIALIST** 

Should have eight (8) years of DOD/Industry experience in configuration management that shows an understanding of the impact that configuration management has on cost, operation, response and maintenance and knowledge of engineering, technical, and maintenance operations and applicable military standards, specifications, policies and procedures including developing Configuration Management Plans, performing Physical and Functional Configuration Audits, and Configuration Status Accounting Reports.

# TECHNICAL WRITER/DOCUMENTATION SPECIALIST

Should have eight (8) years of DOD/Industry experience in developing, preparing, reviewing, critiquing and updating electronic/electro-mechanical equipment and system technical manuals and experience in the preparation of test plans, procedures, and reports.

### **DESIGN ENGINEER (MECHANICAL)**

Should have Bachelor of Science degree in Mechanical Engineering and six (6) years of DOD/industry experience in the design of mechanical devices and antenna tilt mechanisms.

#### ILS SPECIALIST

Should have six (6) years of DOD/industry experience in logistics with at least three (3) years of general experience in providing logistics services required to support equipment and systems acquisition in at least one of the functional elements of ILS. Should have three (3) years specialized experience which demonstrates an in-depth understanding of military logistics support programs including developing Integrated Logistics Support Plans (ILSPs).

#### WAREHOUSEMAN

Should have three (3) years experience in the management and inventory control of material and equipment including researching, ordering, tracking, receipt, inspection, inventory and distribution of equipment and material in the support of government contracts.

### **ASSISTANT**

Should have three (3) years experience with word processing and various database software and be able to type at least 60 WPM, and produce cable running sheets, spreadsheets, and technical reports.

#### SOFTWARE ENGINEER

- -Should have B.S. degree in Computer Science or Information System or equivalent
- -Should have four (4) years experience in the installation, setup, configuration and troubleshooting of UNIX (including HP10.20 and Sun Solaris) Operating Systems.
- -Should have four (4) years experience in the installation, setup, configuration of MS Windows NT based servers and workstation, including associated Sever applications (MS Exchange, SQL, Proxy, IIS)
- Should be MSCE certified.
- Should have experience with naval information systems and shipboard network administration experience.

# **NETWORK SYSTEMS ANALYST**

- Should have an Associate degree in Information Systems or equivalent.
- Should be MSCE certified.
- Should have a minimum 3 years experience in the installation, configuration, and troubleshooting of Ethernet and ATM based LAN's including switch based architectures.
- Should have minimum 3 years experience in the router and switch configuration.
- Experience with naval information systems and shipboard network administration experience.
- Should be CISCO router and switch certified

# UNIX INFORMATION SYSTEMS SPECIALIST

- Associate degree in Information Science or equivalent.
- Should have a minimum of 2 years experience in the installation, configuration and troubleshooting of UNIX based operating systems (including HP 10.20 and Sun Solaris)
- Experience with naval information systems and shipboard network experience.
- Experience with naval data communication feeds.

# NT INFORMATION SYSTEMS SPECIALIST

- Associate degree in Information Systems or equivalent
- Should be MSCE certified
- Should have a minimum of 2 years experience in installation, setup, configuration , and troubleshooting of the Microsoft Windows NT operating systems for servers and workstations.
- Should have a minimum of 2 years experience with the installation, setup, configuration and troubleshooting of various Microsoft server and workstations application including:

MS Exchange Server

MS Internet Information Server

MS Proxy Server

MS SQL Server

MS Office (including Outlook)

- Experience with naval information systems and shipboard network experience.

### ATTACHMENT IV-1 PERSONNEL MATRIX

In accordance with Provision L-345 "Personnel Resume Requirements" of this solicitation, complete and submit the following matrix to identify the allocation of hours per year for each key person proposed. There are an identified number of minimum people to be assigned to each personnel category. Offerors can propose and list herein more personnel than the minimum. The total number of hours proposed for all the individuals in each category must add up to 100% of the estimated annual hours for that category.

CATEGORY	INDIVIDUAL NAME/ TOTAL INDIVIDUALS HRS	ANNUAL HOURS ALLOCATED TO CONTRACT
PP-114		ALLOCATED TO CONTRACT
77		
		- 10 <u>-</u>
	Total Hours	90,000
